**FIVICS BOW
LIMITED LIFETIME WARRANTY**

Fivics recurve handles are guaranteed against manufacturing defects in materials and workmanship to the original owner for the life of the product.

FIVICS[®]
ARCHERY
Team

Thanks to our shooters in Rio, 2016

81shooters choose Fivics Saker Finger tabs from total 128shooters(63%)

It was our pleasure and we feel confidence what they chose Fivics high quality equipment from all around world.

We would like to say thanks to all of shooters.

We will do our best to support you and make you get good score thru high quality equipments.

Thank you very much!

TEAM FIVICS

LIMBS FACTORY OF FIVICS

Since 2016, Fivics's limbs factory has been starting productions. Fivics has own lab testing room and long experiences of archery which never did before. Now, Fivics can apply their own dream and future in the new facility and makes possible of much better quality, innovative ideas on the limbs and most reliable price level.

Unlimited improvement

Fivics is only the one who can do endless challenge, make full passion like fire and make you "If Fivics, they can make new revolutionary idea"

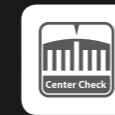

No one has done it yet, but it's worth doing. Fivics has developed new material and has advanced equipment by new and refresh idea toward archery.

FIVICS TECHNOLOGY

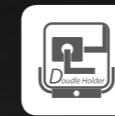

Abandon existing ways of thinking and promote new ideas with fresh senses. Even I won today, there is no way to win again tomorrow. Endless development can make Fivics alive and it is saying "Vitality"

Center Check
New fivics center checking parts make you easy to adjust the center from the special designed scale.

Non Vibration
Patents limb pocket makes non vibration

Double Holder
Double screws on the limbs pockets hold the limbs strongly

Screw joint
No more release of screws during shooting

Ergonomic Grip
comfortable grip and make your shoot clear

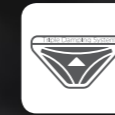

Strong Spine
enough to hold strong spine

Non Vibration
Patents limb pocket makes non vibration

Rubber Coated
Rubber coating makes easy to attach or detach

Triple Damping System
3ways of damping absorb vibration most efficiently

Double Damper
2ways of damping absorb vibration most efficiently

3K Technology
3K carbon is most strongest material for archery

Incert Damper
Strong outside, but inside with rubber to absorb vibration

Nano Tech
New nano technology is applied

Human engineering
Based on human, made for human

Absorption of vibration
More than 1,000 tests make the best absorption of vibration

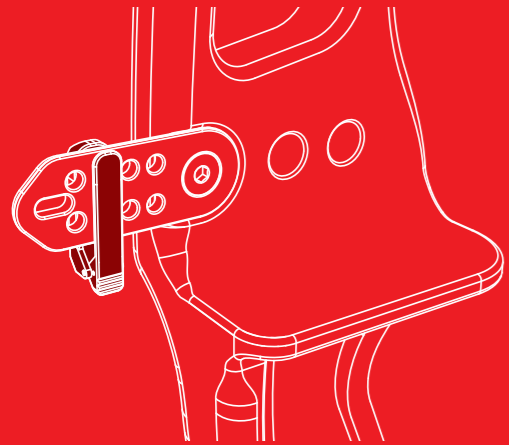

Water proof
Perfect water proof for rainy shooting

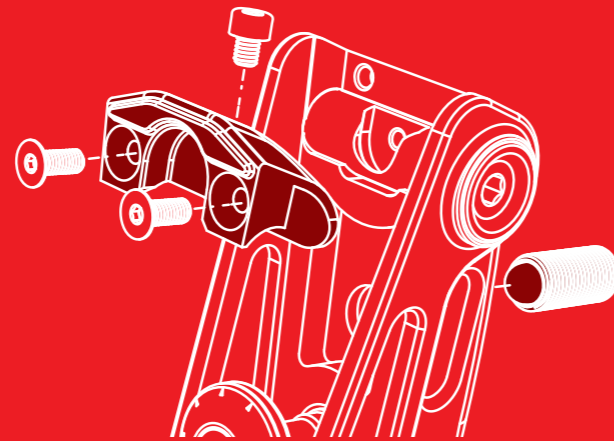

UD Carbon
The best carbon material to be applied limbs

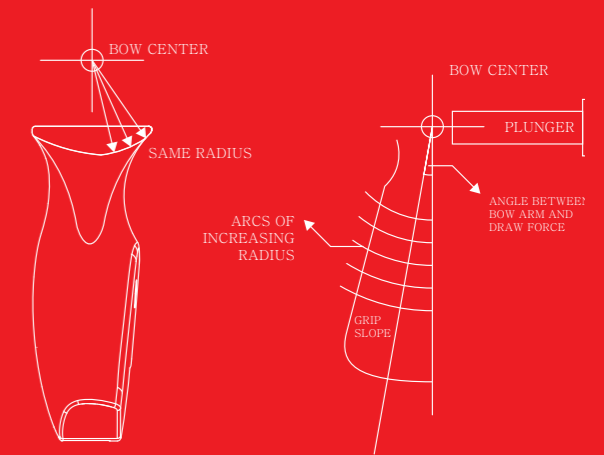

NEW TECHNOLOGY OF LT RISER

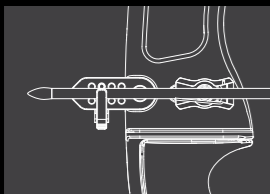

New designed clicker flat and make the best shooting chance.

4 extra bolts are holding the limbs pocket and easy to adjust your limb center with easy way

The best grip position give the best testing result
New desinged V shape of grips make efficient power

Special holes in the clicker flat shows what your arrow is straight or not from rest part

Existing clicker bolts, somtimes hides shooter's sight, but Fivics new clicker flat is different way, not to atache the bolt on the riser. So, it shows shooter's sight without hiding some bolt and easy to make your own bow.

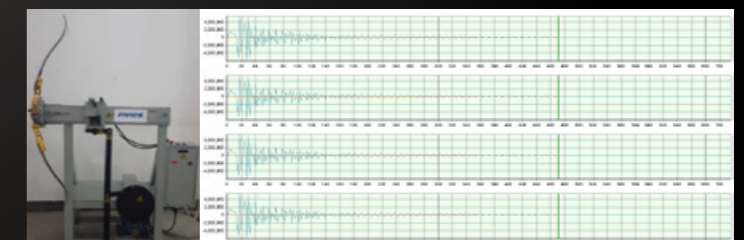

Full aluminum make the strong dularbility.

Best grip angel

3 important points in grip system

1. The grip is located in bow center
2. The grip is located in angel between bow arm and draw force
3. The grip is located in arcs of increasing radius

Best grip postion shows the best test

XQ-3.15™

ARNX001 » XQ-3.15 ARROW (Recurve & Compound)

Excellent in grouping of arrows with stability and accuracy

XQ-3.15, it took more than 3 years testing and developing by Korean national team member, Mr. Jang Young Ho and during testing, we Fivics found the perfect inner diameter to make stability and accuracy between point and shaft, **ϕ 3.15**

Uniform production makes equal specification and has outstanding arrow grouping and reducing arrow damage rate which is always troublesome of carbon arrow's natural.

Fivics also found new material for XQ-3.15 arrow and it is MC 46ton carbon which has strong points in accuracy and durability of epoxy resin.

We, Fivics, hereby can tell you that XQ-3.15 is perfect for Archery competition arrow due to these outstanding reasons.

- Advanced Technology, Extreme Accuracy.
- Straightness: ± 0.001".
- Weight tolerance: ± 1.0 grains.
- Spine selection tolerance: ± 0.002".

TEN Pro

ARTR001 » TENPRO

Strong durability against wind due to 30ton of carbon applied.

New Tenpro is one of ultra slim arrow designed for recurve shooters. There are lots of functions of arrows in Tenpro, but the most important thing is that it has a strong fortress in the middle part and it allows arrow goes straight way. And also, its own ultra slim shape can reduce the wind and very useful and optimized for FITA, NAA and NFAA long field shooting.

30tons of carbon makes extreme speed, strength and consistence in shooting and there speedy restoration from multi-shooting.

- Advanced Technology, Extreme Accuracy.
- Straightness: ± 0.002".
- Weight tolerance: ± 1.0 grains.
- Spine selection tolerance: ± 0.002".

NC001S FIVICS Pin Nock(S)
NC001L FIVICS Pin Nock(L)

This universal pin nock fits all standard pin nock adapters. It is made from a durable polycarbonate material that performs shot after shot.

Size: S / L

Color:

Available in two size: #1 fits 12-18 strand strings
#2 fits 20-24 strand strings

AC01F » EZ FLETCHER

- EZ Fletcher is designed for putting vanes on a shaft very easily.
- automatic shaft holding system,
- angle control system
- magnetic system
- detailed adjustment system

FEATURE
MATERIAL : Aluminum
SIZE : 124 x 124 x 220
COLOR : Black

ARROW & TARGET

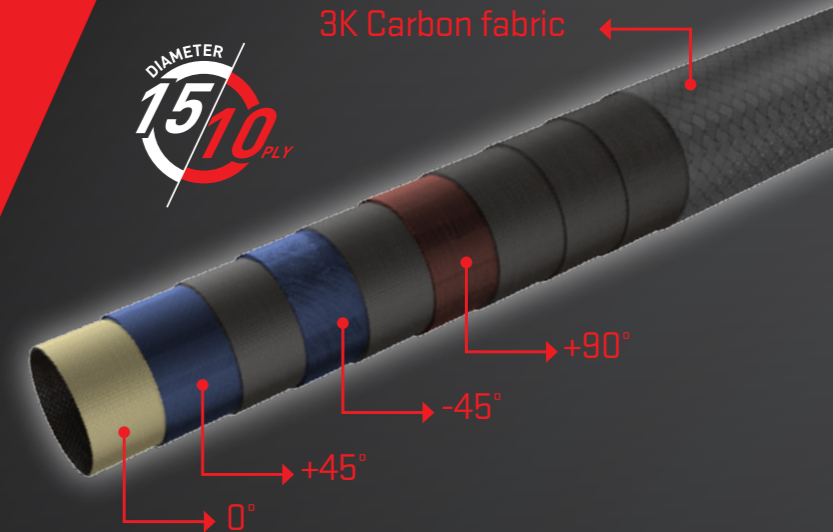

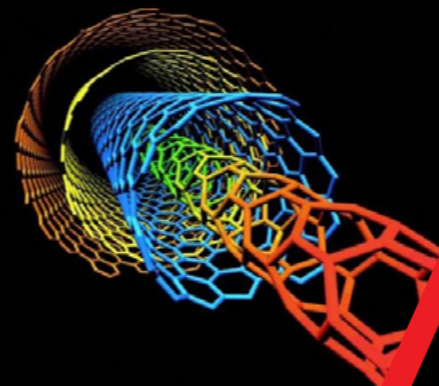

ARROW & TARGET

New recurve sight, FV-300

8pcs of rails inside of head parts hold all surface of sight and make strong stability. Accuracy adjustment function make better movement compared to Wormgear and extra dampers and weights reduce the vibration.

FULL POWER AHEAD

FIVICS STABILIZERS

New products, Phoenix1500D has unique extender system which is not existed and improved more on specially, joint failure part between riser and extender parts from other brands. High density carbon is included in aluminum construction and it prevents joint failure issue and reduces vibration.

Phoenix1500D has 15diameter with 10PLY carbon pipe and strong accuracy against wind. Even it has thin diameter, but due to laminated structure, it makes possible to reduce low vibration with short wave.

Fivics has developed a carbon nano-tube to apply with nano carbon stabilizer. CNT(carbon nanotube) is still invested by Fivics and we have made Non conjugated Polymer, carbon tube - epoxy complex and this technology makes 30% more stronger strength inside of carbon.

BEST QUALITY FIVICS ACCESSORIES

FIVICS ACCESSORIES

FV-300 » FV-300 SIGHT

- Designed for Olympic style / recurve bows
- Special designed weight and damper are excluded, but you can attach
